

TANK MAX

More Hot Water

Install TANK MAX on your water heater to almost **DOUBLE** its hot water output. TANK MAX allows water to be 140° F in the water heater while distributing water to fixtures at 120° F by mixing water from the cold line into the hot water line. This increases hot water output and protects against scalding.

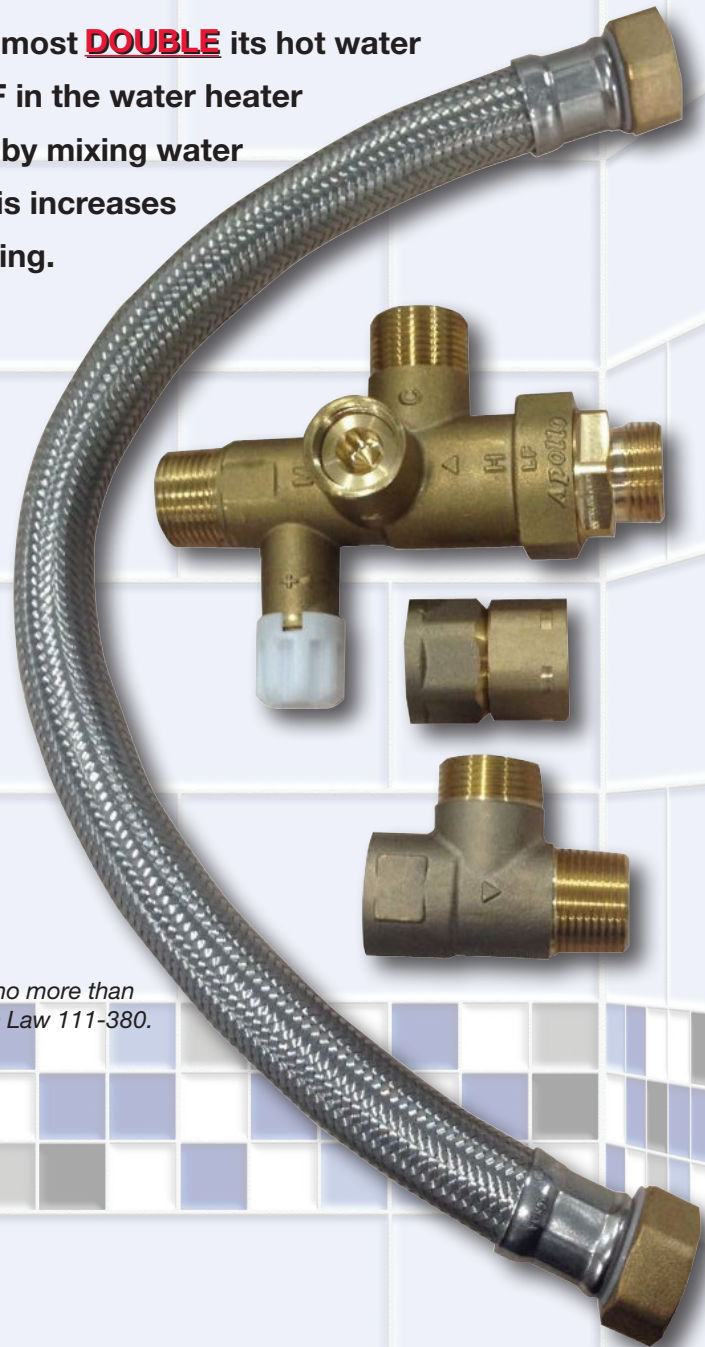

Product Specifications

- Easy to install - no solder or glue needed
- Saves time and money
- ASSE 1017 and 1070
