Stainless Steel Crimp Sleeves

The Apollo PEX Stainless Steel Crimp Sleeve is simple to install and is designed for use with PEX pipe and barb fittings (not included). Stainless steel crimp sleeves provide the utmost in corrosion-resistance and reliability as related to other PEX connection methods. Requires a stainless steel sleeve tool (sold separately).

Apollo PEX fasteners are a key component of the most economical potable water piping systems. Also capable of integration into hydronic heating systems, Apollo PEX fasteners can be used with brass and plastic fittings, valves, and manifolds (all sold separately). The Apollo PEX system is a comprehensive piping system comprised of brass fittings, poly alloy fittings, manifolds, valves, fasteners, tools and tubing designed for implementation in water delivery systems, simple or complex.

Specifications:

Use Apollo PEX Crimp Sleeves with Apollo PEX-B pipe, brass fittings, and poly alloy fittings using the Apollo PEX Stainless Steel Sleeve Tool (69PTKH0014SS). Follow all instructions included with Apollo tools, fittings, and fasteners.

Approvals:

- ASTM F876
- NSF 14 and 61

Installation:

Squarely cut PEX pipe to desired length. Slide sleeve over end of pipe. Slide fitting into pipe and sleeve until the shoulder of the fitting touches the sleeve. Position the tool 1/8" to 1/4" from end of pipe and around sleeve. Compress tool completely according to instructions. Check crimp ring compression with a Go/No-Go Gauge.
